### SUMMARY

Driven and focused on achieving goals Crafting scalable and effective server-side solutions is a passion of mine as a Full-Stack developer. My area of expertise lies in creating and executing frontend & backend systems that promote peak efficiency and facilitate smooth user interactions, using my extensive knowledge of Html, CSS, ReactJS, TailwindCSS, JavaScript, Python and Django. Continual learning, staying up to date on emerging technology, and working with cross-functional teams to develop creative solutions are what drive my journey. In order to advance technology and have a significant impact on the frontend & backend development space, I'm eager to bring my talents and commitment to a vibrant team.

### SKILLS

#### Technical Skills

Frontend - HTML | CSS | ReactJS | Tailwind | Bootstrap  
Backend - Python | Django | JavaScript  
Database - MySQL | PostgreSQL | MongoDB  
Others - C++ | C# | Git

#### Problem Solving Skills

- Total Problem Solved 150+
  - Site Name: Hackerrank
- [Hackerrank Profile](#)

#### Soft Skills

Quick learner | Hardworking | Active listening

### PROJECTS

#### 1. Quizistic (Quiz Game Platform)

Jan 2024

A website using HTML, Bootstrap 5 CSS, Django MVT pattern where user can play quizzes and make their brain sharp.

- Authorized users can play quizzes, give ratings on quizzes and can show the result after playing a quiz.
- After playing a quiz an user can not play that quiz again in 24 hours.

### 3. ParkSpotter (Team Project) - 1 month

Full-Stack Developer and Github Manager

Links: [User App \(PWA\)](#) + [Github](#) || [Parkowner Dashboard + Github](#) || [Admin Dashboard + Github](#) || [Backend-Github](#) (<https://development-parkspotter-pwa.netlify.app/>)

**Overview:** A Parking Management System with a User App, a Park Owner Dashboard, and an Admin Dashboard

**My Contributions:** ( Over 30,000 lines of code Merged and 150+ Commits )

#### i. User App:

- JWT-authenticated sign-up/login
- Mapbox integration with clustering (25% faster loads)
- Redux-based slot booking system
- User profiles with caching (20% faster loads)

#### ii. Park Owner Dashboard:

- Overview with async fetching (40% faster)
- Employee payroll & performance tracking (35% faster)
- Virtualized zones management
- Debounced location updates (15% less server load)
- Real-time slot management

#### iii. Admin Dashboard:

- Optimized dashboards (50% faster data retrieval)
- Analytics with 30% faster graph rendering
- Park owner management with pagination
- Subscriptions menu (20% faster loading)
- Bookings with infinite scrolling
- Interactive Mapbox GL JS integration

**Technology Used:** React, JavaScript, Django REST Api, Progressive Web App (PWA)

### 4. DevTech Ltd. (IT Solutions Agency)

Nov 2025

A website using ReactJS, TailwindCSS, GSAP where client can know about that IT company, know about their work, and contact the company for solutions.

- Awesome animation havebeen made for UI/UX with smooth scrolling.
- Future Updates: Client can login, chat with support, can make an order by quote, show their own dashboard. Admin can show their own dashboard, can show how many orders they got and how much price for projects and details of clients, means admin dashboard.

## EDUCATION

### BSC in Computer Science & Engineering

May 2022 - Running

American International University - Bangladesh

- **Running CGPA - 3.68**

## COURSES

- **Name:** [Phitron](#) (Coding Bootcamp)
- **Duration:** 14 months | **CGPA - 3.33**
- **Recommendation Letter:** From Programming Hero
